AJ-SD255 ***Menu Information***

Setup (initial settings)

The unit's main settings are performed while making selections using a menu-driven system.

When a TV monitor is connected to the VIDEO MON connector on the unit's rear panel, the setup menus will appear on the TV monitor.

■ Changing the settings

(1) Press the MENU button.

The setup menu screen appears on the TV monitor, and the setup menu item number appears on the counter display.

When the FF button is pressed for about 1.5 seconds, the name of the setup menu item is displayed on the counter display. When the same button is pressed again for about 1.5 seconds, the original item No. display is restored.

(If a setup was performed previously, the screen on which the last change was made is displayed.)

(2) Incline the joystick upward or downward to select the item to be set.

The cursor (*) on the menu screen moves, and the item number on the display flashes.

- When the FF or REW button is pressed while holding down the PLAY button, what is on the display is replaced with the next or previous major item.

(3) Incline the joystick to the left or right at the position where the change is to be made.

The setting is now changed.

To return what has been established as the setting to the factory setting, press the RESET button while holding down the SEARCH button.

(4) If there is another item to be changed, repeat steps (2) to (3).

(5) Press the MENU button.

- If none of the settings have been changed, the menu screen display is cleared.
- If a setting has been changed, a confirmation screen appears.
- To activate the change in the setting, press the PLAY button.
- To cancel the change in the setting, press the STOP button.
- To return what has been established as the setting to the factory setting, press the RESET button while the menu is displayed. A confirmation screen now appears, and if the PLAY button is pressed in this status, the factory setting is restored.

Notes:

- If the RESET button is pressed to restore the factory settings, only the user files currently in use are restored. The other user files remain unaffected.
- The changes made to the SYSTEM menu contents are recorded also by pressing the MENU button to close the menu screen.

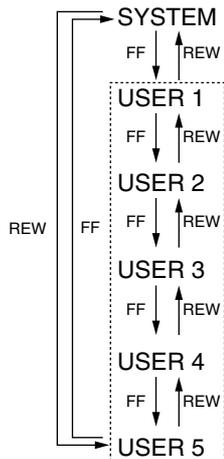

Setup menus

This VTR can hold five user files, each of which has its own specific menu settings, and one of these files can be selected for use.

■ Changing the file

(1) Press the MENU button.

(2) When the FF button is pressed while holding down the PF button, the next user file is selected; conversely, when the REW button is pressed while holding down the PF button, the previous user file is selected.

User files

Each user file contains the following items.

- BASIC
- OPERATION
- INTERFACE
- TAPE PROTECT
- TIME CODE
- VIDEO
- AUDIO
- V BLANK
- DIF
- MENU

(3) Decide on the user file to be used in the step (2) operation, and press the MENU button.

A confirmation screen now appears.

(4) When the PLAY button is pressed, what has been set is stored in the memory.

■ Setting and releasing the lock mode

The lock mode can be set to protect the system file and user file (USER2 to USER5) settings. Once the lock mode is set, no further changes can be made to the settings.

Setting and releasing the lock mode can be set for the system file by using setup menu No. 30 (MENU LOCK) and for the user files by using setup menu No. A03 (MENU LOCK).

(1) Press the MENU button.

(2) Press the REW button or FF button while holding down the PF button to select the file for which the lock mode is to be set or released.

(3) Operate the joystick to move the cursor (*) on the menu screen to item No.30 (MENU LOCK) for the system file or to item No.A03 (MENU LOCK) for a user file.

(4) Press the SEARCH button, and use the joystick to select whether the lock mode is to be set or released.

To set the lock mode:

Select 0001 (ON) as the setting.

To release the lock mode:

Select 0000 (OFF) as the setting.

When the lock mode has been set, LOCKED flashes on the menu screen. The counter display stops flashing and remains lighted.

(5) Press the MENU button.

A confirmation screen now appears.

(6) When the PLAY button is pressed, what has been set is stored in the memory.

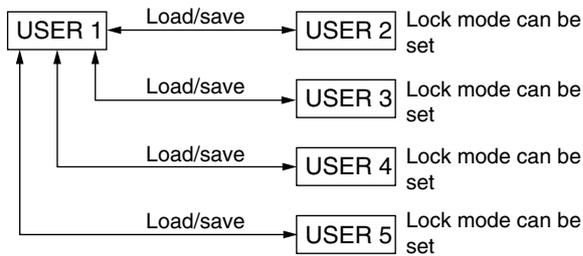

Notes:

- The lock mode cannot be set for the USER1 file.
- Once set to the lock mode, a file cannot be reset to the factory settings even by pressing the RESET button.

Setup menus (continued)

■ Loading user files

The contents of the USER2, USER3, USER4 or USER5 file can be copied (loaded) into the USER1 file. Also, the contents of the USER1 file can be copied (saved) into the USER2, USER3, USER4 or USER5 file.

- (1) Press the MENU button.
- (2) Press the REW button or FF button while holding down the PF button to select the USER1 file.
- (3) Operate the joystick, and move the cursor (*) on the menu screen to item No.A00 (LOAD).

```

SETUP-MENU  MENU
<USER1>    NO .A00-0000
804 BLANK LINE  BLANK
*A00 LOAD      USER2
A01 SAVE      USER2
A02 P. ON LOAD OFF
END
    
```

- (4) Incline the joystick to the left or right to select the user file whose contents are to be loaded into USER1.
- (5) Press the joystick.

The following message appears on the menu screen and counter display.

Menu screen

```

SETUP-MENU  LOAD
USER2 → USER1 OK?
YES<PLAY>/NO<STOP>
    
```

Counter display

The number of the user file selected in step (4) is displayed at ■.

- (6) Press the PLAY button

The settings of the user file selected in step (4) are loaded, and the USER1 menu display appears. If the STOP button is pressed instead, the settings are not changed, and the USER1 menu display appears.

- (7) Press the MENU button.

A confirmation screen now appears.

When the PLAY button is pressed, the USER1 settings are stored in the memory. If the settings are not to be stored in the memory, press the STOP button instead.

■ Saving user files

- (1) Press the MENU button.
- (2) Press the REW button or FF button while holding down the PF button to select the USER1 file.
- (3) Operate the joystick, and move the cursor (*) on the menu screen to item No.A01 (SAVE).

```

SETUP-MENU  MENU
<USER1>    NO .A00-0000
804 BLANK LINE  BLANK
A00 LOAD      USER2
*A01 SAVE     USER2
A02 P. ON LOAD OFF
END
    
```

- (4) Incline the joystick to the left or right to select the user file in which the contents of USER1 are to be saved.

Those user files which have been set to the lock mode do not appear on the display. If all the user files have been set to the lock mode, the "LOCKED" display appears, and the contents of USER1 cannot be saved into any of the user files.

- (5) Press the joystick.

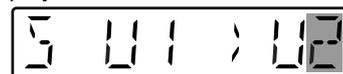

The following message appears on the menu screen and counter display.

Menu screen

```

SETUP-MENU  SAVE
USER1 → USER2 OK?
YES<PLAY>/NO<STOP>
    
```

Counter display

The number of the user file selected in step (4) is displayed at ■.

- (6) Press the PLAY button

The settings of USER1 are saved in the user file selected in step (4) and stored in the memory. If the STOP button is pressed instead, the settings are not changed, and the USER1 menu display appears.

- (7) Press the MENU button.

The regular display is restored.

■ Automatically recalling a user file when turning on the power

If the user file to be loaded is selected in advance using setup menu No. A02 (P.ON LOAD), the file will be automatically loaded into USER1 when the power is turned on.

501 VITC POS-1	<p>This sets the position where the VITC signal is to be inserted.</p> <p>(For AJ-SD255P) (For AJ-SD255E)</p> <p>0000 10L 0000 7L : : 0006 16L 0004 11L : : 0010 20L 0015 22L</p> <p>Notes:</p> <ul style="list-style-type: none"> • The same line as the one used for the setup menu items No. 502 (VITC POS-2) and No. 662 (UMID POS) setting cannot be set. • The default settings are not restored even if the RESET button is pressed while holding down the SEARCH button.
502 VITC POS-2	<p>This sets the position where the VITC signal is to be inserted.</p> <p>(For AJ-SD255P) (For AJ-SD255E)</p> <p>0000 10L 0000 7L : : 0008 18L 0006 13L : : 0010 20L 0015 22L</p> <p>Notes:</p> <ul style="list-style-type: none"> • The same line as the one used for the setup menu items No. 501 (VITC POS-1) and No. 662 (UMID POS) setting cannot be set. • The default settings are not restored even if the RESET button is pressed while holding down the SEARCH button.
503 TCG REGEN	<p>This selects the signal to be regenerated when the time code generator (TCG) in the REGEN mode.</p> <p>0000 TC&UB : Both the time code and user bit are regenerated.</p> <p>0001 TC : Only the time code is regenerated.</p> <p>0002 UB : Only the user bit is regenerated.</p>

No./Item	Description
505 EXT TC SEL	<p>This selects the time code to be used when an external time code is to be used.</p> <p>0000 LTC : The LTC of the TIME CODE IN connector is used.</p> <p>0001 VITC : The VITC of the input video signal or the timecode of the IEEE1394 digital input signal is used.</p>
506 BINARY GP	<p>This sets the usage status of the user bit of the time code generated by the TCG.</p> <p>0000 000 : NOT SPECIFIED (character set not specified)</p> <p>0001 001 : ISO CHARACTER (8 bits character set based on ISO646, ISO2022)</p> <p>0002 010 : UNASSIGNED 1 (undefined)</p> <p>0003 011 : UNASSIGNED 2 (undefined)</p> <p>0004 100 : UNASSIGNED 3 (undefined)</p> <p>0005 101 : PAGE/LINE</p> <p>0006 110 : UNASSIGNED 4 (undefined)</p> <p>0007 111 : UNASSIGNED 5 (undefined)</p>
507 PHASE CORR	<p>This selects whether to control the phase correction of the LTC which is output from the TIME CODE OUT connector.</p> <p>0000 OFF : Phase correction control is not performed.</p> <p>0001 ON : Phase correction control is performed.</p>
508 TCG CF FLAG	<p>This selects whether the CF flag of the TCG is to ON.</p> <p>0000 OFF : CF flag is OFF.</p> <p>0001 ON : CF flag is ON.</p>
509 DF MODE (For AJ-SD255P)	<p>This selects the DF or NDF mode for CTL and TCG.</p> <p>0000 DF : The drop frame mode is used.</p> <p>0001 NDF : The non-drop frame mode is used.</p> <p>Note: DF/NDF switching is valid only when the CONTROL switch is set to LOCAL or the setup menu No. 001 (LOCAL ENA) is set to ENA.</p>

The underlined items indicates the initial setting.

Setup menus (continued)

■ USER menu <TIME CODE>

No./Item	Description
510 TC OUT REF	<p>This is used to switch the phase of the time code, which is output from the TIME CODE OUT connector, for the external LTC input when the TCG switch is at the EXT position.</p> <p><u>0000 V OUT</u> : Time code is synchronized with output video signal.</p> <p><u>0001 TC_IN</u> : Time code is synchronized with external time code input.</p>
511 VITC OUT	<p>This selects how the VITC which is to be superimposed onto the output video signal is to be output.</p> <p><u>0000 SBC</u> : During recording: The input time code, which was selected by the setup menu No. 505 (EXT TC SEL) setting and TCG switch, is output as the VITC. During playback: The time code recorded in the SBC area is output as the VITC.</p> <p><u>0001 VAUX</u> : During recording: The time code detected from the input video signal is output as the VITC. During playback: The time code recorded in the VAUX area is output as the VITC.</p> <p>Notes:</p> <ul style="list-style-type: none"> • The time code detected from the input video signal is automatically recorded in the VAUX area while pictures are being recorded. • If Y P_B P_R, CMPST, S-VIDEO or SDI is selected as the input signal, the VITC output during recording is a timecode superimposed on the input signal regardless of the above setting.
513 RUN MODE	<p>This sets the operation mode which is to make the internal time code generator advance.</p> <p><u>0000 REC</u> : The internal time code generator is advanced during recording.</p> <p><u>0001 FREE</u> : When the power is on, the internal time code generator is advanced regardless of the operation mode.</p>

No./Item	Description
514 VITC GEN	<p>This selects whether or not to record the internal time code generator value in the VAUX area.</p> <p><u>0000 OFF</u> : The internal time code generator value is not recorded in the VAUX area. When video signals on which the time code has been recorded are input, the time code of the input signals is recorded in the VAUX area.</p> <p><u>0001 ON</u> : The internal time code generator value is recorded in the VAUX area.</p>

SBC (sub code data) area:

This area is separate from the video and audio data area on the helical track. The time code complying with SMPTE/EBU standards is stored here. As with the conventional LTC (linear time code), the time code can be read even during rewinding or fast forwarding. It can also be read out when the tape has stopped.

VAUX (video auxiliary data) area:

This area is to be found in the video data area on the helical track. The additional information relating to the video data is stored here.

Note:

The time code and user bit are controlled during tape playback by the data which has been recorded in the SBC area. This means that all the data recorded in the SBC area alone is used as the data which is to be indicated on the counter display section in the middle of the front panel or in the superimposed display, or as the data which is to be transmitted to the editing controller or other unit.

The underlined items indicates the initial setting.

Setup menus (continued)

■ USER menu <VIDEO>

No./Item	Description
600 INT SG	This selects the internal reference signal. 0001 BB : The black burst is generated. 0002 CB100 : 100% color bars are generated. 0003 CB75 : 75% color bars are generated.
602 V-MUTE SEL	This selects whether to mute the video output signals when a blank on the tape has been detected during playback. 0000 N-MUTE : No muting. (Freeze) 0001 LOW RF : Muting. (Set to gray.)
603 CC (F1) BLANK (For AJ-SD255P)	This selects ON or OFF for the closed caption signal of the first field. 0000 BLANK : Signal is forcibly blanked. 0001 THRU : Signal is not blanked.
604 CC (F2) BLANK (For AJ-SD255P)	This selects ON or OFF for the closed caption signal of the second field. 0000 BLANK : Signal is forcibly blanked. 0001 THRU : Signal is not blanked.
605 FREEZE SEL	This selects the freeze mode for still pictures. 0000 FIELD : Field freeze. 0001 FRAME : Frame freeze. Note: When frame freeze has been selected, the frame slow status is established with the slow setting.
609 EDH YA94G	This selects whether to superimpose EDH onto the SDI output signals. 0000 OFF : EDH is not superimposed. 0001 ON : EDH is superimposed.
610 P _B /P _R IN LV (For AJ-SD255P)	This selects the analog component input level. 0000 M II : M II level 0001 B-CAM : B-CAM level
614 P _B /P _R OUT LV (For AJ-SD255P)	This selects the analog component output level. 0000 M II : M II level 0001 B-CAM : B-CAM level

No./Item	Description
622 SETUP (For AJ-SD255P)	For setting 7.5% setup processing to be performed on input and output signals. When the STOP button is pressed, operation is transferred to the sub-screen, and the setup level is set for each output. To return from the sub-screen, press the STOP button again.
Sub-screen	
00 CMPST IN	This selects the 7.5% setup processing for the input composite and S-Video signal. 0000 THRU : The signal is recorded in its original form. 0001 CUT : The signal is recorded with the 7.5% setup removed.
01 CMPST OUT	This selects the 7.5% setup processing for the input composite and S-Video signal. 0000 THRU : The signal is output in its original form. 0001 ADD : The signal is output with the 7.5% setup added. Note: Bear in mind the setting for sub-screen item No. 03 (CMPNT OUT) of setup menu item No. 622 (SETUP).
02 CMPNT IN	This selects the 7.5% setup processing for the input component signal. 0000 THRU : The signal is recorded in its original form. 0001 CUT : The signal is recorded with the 7.5% setup removed.
03 CMPNT OUT	This selects the 7.5% setup processing for the output composite, component and serial (digital) signal. 0000 THRU : The signal is output in its original form. 0001 CUT : The signal is output with the 7.5% setup removed. 0002 ADD : The signal is output with the 7.5% setup added.

The underlined items indicates the initial setting.

YA94G This appears only when the optional board AJ-YA94G has been installed.

No./Item	Description
889 DIF AUD IN (For AJ-SD255P) YAD255G	<p>This selects the channels to be used for recording on the tape when DV format data with audio signals in the 4CH mode are to be input and then recorded on a DVCPRO tape.</p> <p>0000 CH1&2 : Received DV format data CH1 and CH2 are selected. 0001 CH3&4 : Received DV format data CH3 and CH4 are selected.</p>
890 DIF AUD OUT YAD255G	<p>(For AJ-SD255P) This selects the channels when a DV tape with audio signals in the 4CH mode is played and the signals are output in the DVCPRO format or when LOCK48 has been selected as the setup menu item No.891 (DIF DV AUDIO) setting.</p> <p>(For AJ-SD255E) When setup menu No. 891 (DIF DV AUDIO) is set to LOCK48, this selects the output channels for playing back the DV tape with audio signals in 4CH mode.</p> <p>0000 CH1&2 : DV tape CH1 and CH2 are selected. 0001 CH3&4 : DV tape CH3 and CH4 are selected.</p>
891 DIF DV AUDIO YAD255G	<p>This sets the forced audio mode conversion when a DV tape is played and its signals are output in the DV format.</p> <p>0000 THRU : Normal (through) 0001 LOCK : The audio mode is forcibly converted to the LOCK mode. (The frequency is not converted.) 0002 LOCK48 : The audio mode is forcibly converted to 48 kHz/2CH/LOCK.</p>

The underlined items indicates the initial setting.

YAD255G This appears only when the optional board AJ-YAD255G has been installed.

Setup menus (continued)

■ USER menu <MENU>

No./Item	Description
A00 LOAD	<p>This selects the user file whose contents will be loaded into USER1.</p> <p>0000 USER2 : The USER2 file contents are loaded.</p> <p>0001 USER3 : The USER3 file contents are loaded.</p> <p>0002 USER4 : The USER4 file contents are loaded.</p> <p>0003 USER5 : The USER5 file contents are loaded.</p> <p>Note: Pressing the MENU button after loading displays a confirmation screen. Pressing the PLAY button stores the setting values. The setting values are not changed if the STOP button is pressed.</p>
A01 SAVE	<p>This selects the user file into which the USER1 settings will be saved.</p> <p>0000 USER2 : The settings are saved in USER2.</p> <p>0001 USER3 : The settings are saved in USER3.</p> <p>0002 USER4 : The settings are saved in USER4.</p> <p>0003 USER5 : The settings are saved in USER5.</p> <p>0004 LOCKED : This display appears when all the user files are in the change prohibit status.</p> <p>Notes:</p> <ul style="list-style-type: none"> • User files whose status have been set to change prohibit cannot be selected. • When all the user files are in the change prohibit status, the "LOCKED" display appears and the contents cannot be saved.

Notes:

- No. A00 (LOAD), No. A01 (SAVE) and No. A02 (P. ON LOAD) are the menu items which can be set only for USER1. They are not displayed with the USER2 – USER5 files.
- No. A03 (MENU LOCK) is the menu item which can be set only for the USER2 – USER5 files. It is not displayed with USER1.

No./Item	Description
A02 P. ON LOAD	<p>This loads the contents of the selected user file into USER1 and it starts operation with the USER1 settings when the power is turned on.</p> <p>0000 OFF : Operation is started with the settings of the previously set user file.</p> <p>0001 USER2 : The contents of USER2 are loaded into USER1 and operation is started with the USER1 settings.</p> <p>0002 USER3 : The contents of USER3 are loaded into USER1 and operation is started with the USER1 settings.</p> <p>0003 USER4 : The contents of USER4 are loaded into USER1 and operation is started with the USER1 settings.</p> <p>0004 USER5 : The contents of USER5 are loaded into USER1 and operation is started with the USER1 settings.</p>
A03 MENU LOCK	<p>This selects whether to set or release the user file (USER2 – USER5) lock mode.</p> <p>0000 OFF : The lock is released (changes can be made).</p> <p>0001 ON : The lock is set (changes are prohibited).</p> <p>Note: The lock cannot be set for USER1.</p>
A04 PF1 ASSIGN	The setup menu item is stored to the PF1 button.
A05 PF2 ASSIGN	The setup menu item is stored to the PF2 button.
A06 PF3 ASSIGN	The setup menu item is stored to the PF3 button.

The underlined items indicates the initial setting.
