MANFROTTO 502 TRIPOD SYSTEMS AND HEADS

The MVH502A and MVH502AH tripod heads incorporate a smooth professional fluid pan and tilt that replaces the fluid/tension pan of the 501HDV. This head is available in two models: the MVH502A has a 75 mm ball base, while the MVH502AH has a flat base with 3/8" thread.

The MVH502A is available
in three tripod systems:

The NEW MVK502AM
MVK502C
MVH502A,546BK

MVK502C

Includes the MVH502A head, 535 carbon fiber tripod and carrying case. The 535 tripod is the sturdiest CF tripod Manfrotto has ever made. The system can go in low mode to a height of 16.2 inches or stand as tall as 72.8 inches.

MVK502AM

The MVK502AM incorporates Manfrotto's new MVT502AM tripod with the MVH502A head. The system is lightweight, compact and is amazingly sturdy. The new telescoping tandem; or twin tubes are a first for Manfrotto. Provides the stability of a twin tube tripod with the ease of use of a single leg tripod. Folds to only 29 inches long, making it a great choice for backpacking or as a carry-on option.

MVH502A,546BK

The replacement for the 501HDV,546BK. The system comes with an adjustable midlevel spreader and carrying case.
