## THE SCIENCE BEHIND STRENGTH AND LIGHTNESS

The Pelican™ Air case has been designed to cut weight without compromising durability. Our engineers have revolutionised the protector case by reducing structural waste while preserving Pelican's legendary standards of strength. In development for years, the design team challenged the status quo to "add lightness" in every detail.

Here are some important reasons why Pelican™ Air cases are both strong and light:

- Moulded from the next generation of Pelican's lightweight HPX™ resin, a proprietary formula that rebounds without breaking
- Honeycomb structural elements that are actually stronger than solid polymer material
- Super-stiff "full box" sections engineered to create hollow parts

### EXTREME ENGINEERING—UP TO 40% LIGHTER

## UP TO THE TEST

It wouldn't be a Pelican™ case if you couldn't drop it, kick it and run over it – and the Pelican™ Air case is no different.

- Drop-tested on concrete with loads from 1,8 m on all sides and corners
- Submerged for 30 minutes at a depth of one meter
- Wheels are roll tested over 1 km with loads at 8 km/h
- 12,7 kg steel dart dropped on all sides from 1 m

## TRAVEL LIGHT

Both cases include a rugged extendable handle that keeps the case clear of your heels when walking, and smooth rolling ball bearing wheels that are nice and quiet.

Getting through the airport with a Peli™ Air case is a lot easier, and saves money on over-weight luggage fees, too.
