

MEDUSA DSLR CAGE

Fluid. Tough. Limitless.

Medusa is a critical addition to any DSLR system, leading the way into the next generation of cages. With its dovetailed, quick release tripod plate you can quickly remove your rig from the rails on the fly.

The new formfitted handles add stability and comfort providing countless options for handling and bracing your rig.

Features:

- supports standard 15mm rails
- supports 5/8" standard grip rod
- quick release rails mount
- vari-mount top plate
- 2 vari-mount hand grips
- removable top plate for DSLR rig configuration (lower center image)

Includes:

- 1/4" 20 and 3/8" quick release tripod mount
- 2 vari-mount hand grips
- multi-mount top plate

Available:

- top clamp (for accessories)
- monitor and shoe mounts
- top mounted 15mm rails block (for cage building)
- top mounted 100mm ball (for jib mount)

Change Medusa's form with ease using the kip handles and 8 swivel joints – providing customizable height and width to optimize your rig. The top plate allows you to mount microphones and additional peripherals and also works great when mounted to a jib.

SHOW THE WORLD.
